COPYRIGHT STATEMENT

The copyright law of the United States (Title 17, United States Code) governs the making of photocopies or other reproductions of copyrighted materials including foreign works under certain conditions. In addition, the United States extends protection to foreign works by means of various international conventions, bilateral agreements, and proclamations.

Under certain conditions specified in the law, libraries and archives are authorized to furnish a photocopy or other reproduction. One of these specified conditions is that the photocopy or reproduction is not to be "used for any purpose other than private study, scholarship, or research." If a user makes a request for, or later uses, a photocopy or reproduction for purposes in excess of "fair use," that user may be liable for copyright infringement.

The Columbia University Libraries reserve the right to refuse to accept a copying order if, in its judgement, fulfillment of the order would involve violation of the copyright law.

FARM ANIMALS—CATTLE, SWINE, AND CHICKENS.

SCOPE AND PURPOSE OF BULLETIN.

The object of this bulletin is to present in compact form those 1920 census figures which best indicate the extent to which cattle, swine, and chickens are kept and raised on farms in the United States. Special stress is laid upon the number of farms reporting each of these different classes of live stock; and the number of farms *not* reporting any cattle, or swine, or chickens is made an important feature. This latter figure represents what one writer has termed "the number of cowless, sowless, or henless farms," and serves to call attention, in areas adapted to the raising of live stock, to the opportunity for extending this branch of agriculture.

Comparative figures for the censuses of 1920 and 1910 are given, by divisions and states, in all cases where the 1910 (or 1909) data are available, While the figures for the two censuses are not strictly comparable, on account of the change in the date of enumeration from April 15 in 1910 to January 1 in 1920, the comparison affords a rough indication of the progress that has been made during the decade.

Tables 1 and 2 present the United States totals for all of the items covered by this bulletin and afford a brief summary of the whole field. Tables 3, 4, 5, and 6, give the live-stock data by divisions and states, while Tables 8 and 9 give the principal items, for the 1920 census only, by states and counties.

The number of farms and the farm acreage for 1920 and 1910 are shown, by divisions and states, in Table 7, in order that these fundamental data may be conveniently at hand for comparisons or as a general indication of the relative importance of the farm area in the several states.

SUMMARY FOR THE UNITED STATES.

The United States totals for all of the items presented in this bulletin are given in two brief summary tables. Table 1 gives the total number of farms in the United States which reported cattle, swine, and chickens, respectively, in 1920 and 1910; the numbers of animals or fowls reported; the average number per farm; and the number of farms not reporting. Table 2 summarizes the figures for calves and pigs raised in 1919, and for eggs produced and chickens raised in 1919 and 1909. A discussion of each of the several subjects covered by these summary tables is presented below, in connection with the more detailed table showing the data on that subject by divisions and states.

TABLE 1.—CATTLE, SWINE, AND CHICKENS ON FARMS—SUMMARY FOR THE UNITED STATES: 1920 AND 1910.

ITEM.		FARMS REPORTING.		Number reported.	Average number per farm reporting.	Number of farms not reporting.
		Number.	Per cent of all farms.			
Cattle on farms	1920	5,358,243	83.1	66,652,559	12.4	1,090,100
	1910	5,284,916	83.1	61,803,866	11.7	1,076,586
Swine on farms	1920	4,850,807	75.2	59,346,409	12.2	1,597,536
	1910	4,351,751	68.4	58,185,676	13.4	2,009,751
Chickens on farms	1920	5,837,367	90.5	359,537,127	62	610,976
	1910	5,578,425	87.7	280,340,959	50	783,077
Total number of farms in the United States	1920	6,448,343	.....	.....	.....	.....
	1910	6,361,502	.....	.....	.....	.....

TABLE 2.—CALVES AND PIGS RAISED ON FARMS IN THE UNITED STATES, 1919; AND EGGS PRODUCED AND CHICKENS RAISED, 1919 AND 1909.

ITEM.	1919	1909
Calves raised	21,133,385	.....
Pigs raised	62,072,829	.....
Eggs produced on farms, as reported [1] (dozens)	1,571,329,190	.....
Eggs produced on farms, total, including estimates [2] (dozens)	1,654,041,932	1,574,979,416
Chickens raised on farms, as reported	405,488,930	.....
Chickens raised on farms, total, including estimates [2]	473,301,959	460,611,201

[1] Chicken eggs only.
[2] Estimates were made for farms reporting chickens on hand but no eggs produced or no chickens raised.

CATTLE ON FARMS.

The number of farms in the United States reporting cattle in 1920 was 5,358,243, or 83.1 per cent of all farms, as compared with 5,284,916 farms in 1910, representing exactly the same percentage of the total number. The number of farms not reporting any cattle in 1920 was 1,090,100, as compared with 1,076,586 in 1910. The average number of cattle per farm reporting was 12.4 in 1920 and 11.7 in 1910.

The number of cattle on farms in the United States, according to the census of 1920, was 66,652,559, while the number reported at the census of 1910 was 61,803,866. In making comparisons between the two census years, however, the change in the date of enumeration must be taken into account. The 1910 census, taken as of April 15, included 7,806,539 calves born between January 1 and April 15, 1910, or probably more than one-half of the calves born in the spring of that year. On the other hand, the cattle enumerated as of January 1, 1920, included large numbers of animals destined to be slaughtered or marketed before April 15. The number of cattle thus gained by the earlier enumeration in 1920 would offset to a great extent the number of spring calves included in the total for 1910.

The total number of cattle reported for 1920 exceeds the total number in 1910 by 4,848,693, or 7.8 per cent. The actual increase, after due allowance has been made for the effects of the change in the date of enumeration, is doubtless considerably more than this but less than the difference between the number of cattle in 1910, excluding spring calves, and the number of cattle in 1920, which would amount to 12,655,232.

Cattle, by states.—The number of farms reporting cattle in 1920 exceeded 90 per cent of all farms in 12 states, as follows: Iowa, Wisconsin, Minnesota, West Virginia, North Dakota, Kansas, Missouri, Illinois, Indiana, Nebraska, South Dakota, and Ohio. In 20 states less than 90 per cent but more than 80 per cent of the farms reported cattle; in 12 states, less than 80 per cent, but more than 70 per cent; and in 4 states, less than 70 per cent.

The states having the largest numbers of cattle on farms in 1920 were Texas, with 6,156,715; Iowa, with 4,557,708; Nebraska, with 3,154,265; Wisconsin, with 3,050,829; and Minnesota, with 3,021,469.

The average number of cattle per farm reporting ranged from 3.2 in South Carolina to 141.6 in Nevada. In 9 states the average number of cattle per farm exceeded 25, as follows: Nevada, 141.6; Arizona, 105.8; Wyoming, 68.7; New Mexico, 60.6; Colorado, 34.8; South Dakota, 34.6; Montana, 27.9; Nebraska, 27.7; and California, 26.9.

The number of cattle on farms, the number of farms reporting cattle, and the number of farms not reporting cattle are shown for 1920 and 1910, by divisions and states, in Table 3 and also by states and counties, for 1920 only, in Table 8, page 15.

SWINE ON FARMS.

The number of farms reporting swine on hand on January 1, 1920, was 4,850,807, or 75.2 per cent of all farms in the United States, while the number of farms reporting swine on hand on April 15, 1910, was 4,351,751, or 68.4 per cent of all farms. The number of farms not reporting swine in 1920 was 1,597,536, as compared with 2,009,751 in 1910. These figures indicate a considerable increase during the decade in the extent to which farmers make a practice of keeping swine. Further, the number of farms having swine is considerably greater in the middle of the summer, after those farmers who breed no swine have purchased the pigs which they intend to raise during the year, than it is either on January 1 or on April 15. The average number of swine per farm reporting was 12.2 in 1920, as compared with 13.4 in 1910.

The number of swine on farms in the United States on January 1, 1920, was 59,346,409, while the number on April 15, 1910, was 58,185,676. The 1920 census, taken in January, was too early to include any spring pigs, while the 1910 census, taken as of April 15, included 23,051,579 pigs born between January 1 and April 15, 1910. On the other hand, any farm census taken in January would include large numbers of hogs destined for sale or slaughter before April 15.

TABLE 3.—CATTLE—FARMS REPORTING, NUMBER, AVERAGE NUMBER PER FARM, AND FARMS NOT REPORTING, BY DIVISIONS AND STATES: 1920 AND 1910.

[Figures by counties for 1920 in Table 8.]

The number of spring pigs included in the census of 1910 was probably more than one-half of the annual "crop" of pigs, and there is no doubt but that the number of young pigs gained by the lateness of the enumeration in 1910 considerably exceeds the number of hogs destined for sale or slaughter during the first 3½ months of the year, which were gained by the early enumeration in 1920. It is evident, then, that the number of swine reported for 1910 is too large for a fair comparison with the number reported for 1920—as much too large as the number of pigs born between January 1 and April 15 exceeds the number of hogs sold or slaughtered during the same period. The figures as reported for the two censuses show an increase of 1,160,733, or 2 per cent, between 1910 and 1920. Without question, however, the actual increase in the number of swine was much greater than this, though it is difficult to find a satisfactory basis for even an estimate as to how much greater.

Swine, by states.—Swine were reported on 88.9 per cent of all farms in Iowa on January 1, 1920; on 85.4 per cent of all farms in Nebraska; and on more than 80 per cent of the farms in 12 other states, as follows: Indiana, Illinois, Alabama, South Dakota, Missouri, North Carolina, Georgia, Virginia, Minnesota, Tennessee, South Carolina, and Wisconsin. In 14 states the percentage of farms reporting swine was between 70 and 79.9; in 6 states, from 60 to 69.9; in 10 states, from 50 to 59.9; and in 4 states less than 50 per cent of the farms had swine on the date of the census.

Six states reported more than 3,000,000 swine on farms in 1920, as follows: Iowa, 7,864,304; Illinois, 4,639,182; Missouri, 3,888,677; Indiana, 3,757,135; Nebraska, 3,435,690; and Ohio, 3,083,846.

The average number of swine per farm reporting ranged from 3.3 in Maine to 41.4 in Iowa, the following states showing an average of more than 15 per farm: Iowa, 41.4; Nebraska, 32.3; South Dakota, 31.4; Illinois, 23.3; Indiana, 21.8; Florida, 18.9; California, 18.2; Missouri, 17.9; Minnesota, 16.5; Ohio, 15.5; and Nevada, 15.4.

The number of swine on farms and the number of farms reporting and not reporting are shown for 1920 and 1910, by divisions and states, in Table 4 and also by states and counties, for 1920 only, in Table 8, page 15.

CHICKENS ON FARMS.

The number of farms reporting chickens in 1920 was 5,837,367, or 90.5 per cent of the total number of farms in the United States. The number of farms reporting chickens in 1910 was 5,578,425, or 87.7 per cent of all farms. The number of farms not reporting chickens in 1920 was 610,976, as compared with 783,077 in 1910. These figures indicate a considerable decrease in the number of farms not having chickens, in spite of the fact that there was an increase in the total number of farms. The average number of chickens per farm reporting on January 1, 1920, was 62, while the average on April 15, 1910, was only 50.

The total number of chickens on farms on January 1, 1920, was 359,537,127, as compared with 280,340,959 on April 15, 1910. Taken at their face value, these figures would indicate a marked increase (28.2 per cent) in the number of chickens on farms. As a matter of fact, however, the earlier enumeration of the 1920 census is largely responsible for the greater number of chickens reported. Chickens are marketed and slaughtered to a considerable extent throughout the year, and an enumeration in January of a given year would include a large number of chickens which would be disposed of during the first 3½ months of the year and which would not, therefore, be counted in an enumeration made for April 15 of the same year. Since no chickens under 3 months of age were included at the census of 1910, there would be no additions on account of young chickens hatched between January and April to offset the sale and slaughter of the older fowls. The production of eggs shows an increase of about 5 per cent, and it is probable that the actual increase in the number of chickens on farms was not very much greater than this.

Chickens, by states.—Chickens were reported on 96.1 per cent of all farms in Delaware in 1920; on 95.6 per cent of the farms in Illinois; and on 95.1 per cent of those in Iowa and Maryland. In 18 states the percentage of all farms reporting chickens was between 90 and 94.9; in 18 states, between 80 and 89.9; and in 8 states, between 70 and 79.9 per cent of the farms reported chickens.

Four states reported more than 20,000,000 chickens on farms in 1920, as follows: Iowa, 27,746,510; Illinois, 25,120,643; Missouri, 24,883,985; and Ohio, 20,232,637. Ranking next in order were Texas, Kansas, and Indiana, each reporting more than 15,000,000.

The average number of chickens per farm reporting varied from 23 in South Carolina to 137 in Iowa, amounting to 100 or over in 6 states, as follows: Iowa, 137; California, 113; Illinois, 111; Kansas, 109; Missouri, 100; and Nebraska, 100.

The number of chickens on farms and the number of farms reporting and not reporting are given for 1920 and 1910, by divisions and states, in Table 5 and also by states and counties, for 1920 only, in Table 8, page 15.

TABLE 5.—CHICKENS—FARMS REPORTING, NUMBER, AVERAGE NUMBER PER FARM, AND FARMS NOT REPORTING, BY DIVISIONS AND STATES: 1920 AND 1910.

[Figures by counties for 1920 in Table 8.]

CALVES AND PIGS RAISED.

The number of calves raised on farms during the year 1919, according to the Fourteenth Census, was 21,133,385 and the number of pigs raised in the same year was 62,072,829. In connection with the inquiry on the farm schedule through which these figures were obtained the following instructions were given to the enumerators: "Include all young animals born in 1919, which have been retained on the farm, sold to others, or slaughtered for food. Do not include any young animals purchased or any that died."

Calves and pigs raised, by states.—Five states reported more than 1,000,000 calves raised in 1919, as follows: Texas, 1,682,530; Iowa, 1,447,603; Wisconsin, 1,351,982; Minnesota, 1,047,150; and Illinois, 1,004,521. Other states reporting more than 800,000 were Kansas, Nebraska, Missouri, and New York.

The states reporting the largest numbers of pigs raised in 1919 were Iowa, with 8,804,746; Illinois, with 5,364,756; Indiana, with 4,646,894; Missouri, with 4,484,884; and Ohio, with 3,989,970. Other states reporting over 2,000,000 were Nebraska, Minnesota, Wisconsin, and South Dakota.

The number of calves and pigs raised on farms in 1919 is given, by divisions and states, in Table 6, and by states and counties in Table 9. Comparative figures for 1909 are not available, since this information was not called for by the Thirteenth Census schedule.

EGGS PRODUCED AND CHICKENS RAISED ON FARMS.

The number of chicken eggs produced on farms in 1919, as reported, was 1,571,329,190 dozens. Including estimates for farms which reported chickens on hand but failed to report eggs produced, the total production of eggs in 1919 was 1,654,044,932 dozens, while the total production of chicken eggs in 1909, including estimates, was 1,574,979,416 dozens. The returns for the year 1909, as published in the reports of the Thirteenth Census, included all eggs produced, the United States total being 1,591,311,371 dozens. The 1909 production of chicken eggs has been obtained, for comparison with the 1919 figures, by estimating the number of eggs other than chicken eggs and deducting it from the total as published.

The number of chickens raised on farms in 1919, as reported, was 405,488,930. Including estimates for the farms which reported chickens on hand but no chickens raised, the total amounts to 473,301,959, as compared with 460,611,201 chickens raised on farms in 1909. The reports of the Thirteenth Census show the number of all fowls raised on farms in 1909, which amounted to 488,468,354, rather than the number of chickens. The number of chickens has been obtained, for comparison with the 1919 figures, by deducting from the published total the estimated number of fowls other than chickens.

TABLE 6.—CALVES AND PIGS RAISED ON FARMS, 1919; AND EGGS PRODUCED AND CHICKENS RAISED, 1919 AND 1909, BY DIVISIONS AND STATES.

[Figures by counties for 1919 in Table 9.]

[1] Chicken eggs only. The returns for 1909 included all eggs produced. To obtain figures for chicken eggs alone, the quantity of eggs of other kinds has been estimated and deducted.

[2] The returns for 1909 included all kinds of fowls raised. To obtain figures for chickens alone, the number of other fowls raised has been estimated and deducted.

[3] Estimates have been made, by states (but not by counties), for farms reporting chickens on hand but no eggs produced or no chickens raised.

Chickens and eggs, by states.—Taking the figures for the total production, including estimates, there were 4 states which produced more than 100,000,000 dozens of eggs in 1919, as follows: Iowa, 120,697,319 dozens; Missouri, 117,203,569 dozens; Illinois, 105,757,907 dozens; and Ohio, 102,377,143 dozens. Other states which produced more than 50,000,000 dozens included Indiana, Kansas, Pennsylvania, New York, Texas, California, Minnesota, Michigan, and Wisconsin.

On the same basis, the states reporting the largest numbers of chickens raised in 1919, in order, were Iowa, with 31,076,091; Illinois, with 29,893,565; Missouri, with 29,363,102; Texas, with 25,829,724; Indiana, with 22,618,296; Kansas, with 22,502,600; and Ohio, with 22,458,227.

The figures for eggs produced and chickens raised in 1919 and 1909 are given, by divisions and states, in Table 6, and also by states and counties, for 1919 only, in Table 9.

NUMBER AND ACREAGE OF FARMS.

Table 7 shows, by divisions and states, the number of farms, the total farm acreage, and the number of acres of improved land in farms for both 1920 and 1910. The number of farms, as shown in this table, forms the basis for the percentage of all farms reporting cattle, swine, and chickens, as shown in Tables 3, 4, and 5. The acreage and the improved acreage will serve to indicate the relative importance of the farming industry in the several states.

COUNTY TABLES.

Tables 8 and 9 give, by counties, the principal items from the 1920 census relating to cattle, swine, and chickens. Table 8 (p. 15) gives the number of cattle, swine, and chickens on farms in each county, the number of farms reporting each of these kinds of live stock, and the number of farms not reporting, together with the total number of farms in the county. Table 9 (p. 71) shows, by counties, the number of calves, pigs, and chickens raised, and the number of dozens of eggs produced on farms in 1919.

TABLE 7.—NUMBER AND ACREAGE OF FARMS, BY DIVISIONS AND STATES: 1920 AND 1910.

[Figures for number of farms in 1920, by counties, in Table 8.]
